I Make America joined AEM member Super Products on Thursday, April 25, 2019 for a groundbreaking ceremony for the company's new facility in Mukwonago, Wisconsin.

Super Products manufactures truck-mounted vacuum equipment, and the company is relocating its headquarters from New Berlin, Wisconsin to nearby Mukwonago. A subsidiary of Alamo Group (USA) Inc., Super Products has been an AEM member since 1947. The groundbreaking marks the start of a construction project which will bring the company's three current facilities under one roof. Doing so will prepare Super Products and its employees for the future, and allow for increased efficiency and production.

Our brand new facility in Mukwonago, Wisconsin was designed for improved efficiencies, while consolidating our manufacturing and customer support operations under one roof in a 170,000 square-foot facility. This new building will allow us to increase production capacity needed to meet future growth targets in our vacuum truck sales and rental operations. In this facility we have implemented renewable energy processes and manufacturing workflows using automation where possible, for example our Andon and TAKT time boards that monitor the status of each production line. We have also brought previously outsourced operations in house with our new state-of-the-art ICAFe paint booth system.

Super Products llc takes great is pride of its products is defined as American-made under "Buy American" 50 percent of its constituent parts and/or materials originated in the US.
